

Data Product Manager

Data Product Manager with 6 years turning complex industrial and aerospace data into products teams actually use. Technical by background, product by practice - full-stack and data-engineering roots, and I don't just write specs, I ship. Documentation-first and autonomous, at my best in distributed teams.

Skills & stack

PRODUCT	Product roadmap · backlog & prioritisation · data modelling · user stories · stakeholder management · data migration · Agile / Scrum
DATA / TECH	Power BI / DAX · SQL / Power Query · Python / Pandas · Azure / APIs · Power Automate · OutSystems · Figma / UX

Experience

Data Product Manager / Product Owner

MOST RECENT

AUG 2024 – APR 2026

Safran Aircraft Engines - Project SPECTRE 4.0 - Remote / hybrid

- Owned the data strategy to centralise engineering documentation, scoping business needs across engineering and operations teams.
- Led the migration from Excel to **OutSystems** and built the Python and Power Query transformation pipelines behind it.
- Shipped Power BI dashboards for validation tracking, adopted in steering committees, and ran the supporting business workshops.
- Coordinated with IT on API integration and Power Automate flows to automate the process end to end.

Product Owner - Project SCORE

OCT 2021 – MAR 2024

Safran Aircraft Engines

- Owned the roadmap and backlog for digitalising Support & Services contract data.
- Delivered Power BI reporting and functional documentation, driving business / IT coordination.
- Shipped API interconnections across internal applications.

Instructor - Data, Python, AI & Prompt Engineering

SEP 2025 – PRESENT

Omnes Education (ESSEC, INSEEC, Sup de Pub) via Liora / TechAway · Remote

- Deliver course modules and hands-on labs remotely across university programmes.

Export & Didactic Project Manager

NOV 2015 – JAN 2019

Festo

- Managed **€3M** international programmes with Defence and Education ministries; coordinated national digital-learning projects with the Ministry of Education and Thales.

Independent projects - builder track record

- Modulaire Studio (SASU), founder** - ran a full music-release lifecycle and a Shopify store with custom Liquid development and international logistics; hundreds of units sold across 7+ countries.
- Shopify build & growth** - built and ran philippebouveret.com end to end (store, UX, paid social); **10K€+ monthly revenue**.
